SUBJECT:

Pomona City Jail 2007 Annual Detention Review

The Los Angeles Field Office, Office of Detention and Removal conducted a detention review of the Pomona City Jail on May 23, 2007. DO b6, b7c and SDDO conducted this review. This facility is used for detainees requiring housing less than 72 hours.

The review measured compliance with the ICE Detention Standards. No other special assessments were performed or requested at this time. Attached to this memorandum is a copy of the original Form 324B Detention Review Forms. All worksheets and working papers are maintained in the appropriate file system and are available for review by the review authority.

## Type of Review:

This review is a scheduled Operational Review to determine general compliance with established Immigration and Customs Enforcement (ICE) National Detention Standards.

## **Review Summary:**

The following review summarizes only those standards <u>not</u> in full compliance. Each standard is identified and a short summary is provided regarding standards or procedures not currently in compliance. The facility was been secredited by the California Board of Consections. Their accreditation is current and in good standing. There are some minor differences in the policies that the Detention Standards describe in comparison to the operating procedures of the facility. It appears that even though these differences exist the facility is either adhering to the Standards or abiding by the intent of the Standards. The differences noted are minor in nature and are caused by the small size of the facility. There were 23 acceptable standards, 2 standards determined to be non-applicable and 2 deficient standards.

#### Detainee Handbook

• The Handbook is not distributed to the detainee's on a consistent basis.

## Environmental Health and Safety

• The Facility does not have the Manufacturers Material Safety Data Sheets (MSDS).

## **RIC Observations**

The Pomona City Jail's ability to directly supervise and control their detainee population's behavior has proven to be effective. Overall the review indicated substantial compliance with the Ice Detention Standards. The staff I encountered were courteous, knowledgeable and professional. I believe it is in the Service's best interest to continue contracting with this facility.

## Constraints of difficulties experienced during the review:

During the review, no constraints or abnormal difficulties were encountered. Staff and detainees were cooperative and available to assist in the review process.

## At Risk or Repeat Findings:

There were 2 ICE Detention Standards found to be Repeat findings during the inspection of this facility.

## Recommended Rating and Justification:

The result of a careful evaluation and review of the procedures and operation reflects the ability of this facility to provide ICE detainees with the proper and humane care that is mandated by the Standards. The deficiencies that exist do not detract from the acceptable accomplishments of the vital functions. It is the Reviewer in Charge recommendation that the facility receive a rating of "Deficiant".

### **RIC Assurance Statement:**

All findings of this review have been documented on Form G-324B and are supported by the written documentation contained in the review file.
