MEMORANDUM FOR: Victor X. Cerda

Acting Director

Headquarters Detention and Removal Operations

FROM:

Reviewer-In-Charge,

Headquarters Detention and Removal Operations

SUBJECT: Review Summary Report, Pomona City Jail

The Headquarters Office of Detention and Removal (HQDRO) performed a review of the Pomona City Jail, an IGSA facility. It was conducted on June 21, 2004. This review was performed under the supervision of b6, b7c Reviewer-In-Charge, and assisted by Detention Operations Supervisor 66, b7c , Los Angeles Field Office.

The review measured compliance with the ICE Detention Standards. No other assessments were performed or requested at this time. Attached to this memorandum is a copy of the original Form G-324B Detention Inspection Form. All worksheets and working papers are maintained in the appropriate file system and are available for review by the Review Authority.

Type of Review:

This review was a routine scheduled assessment and was conducted for the sole purpose of determining overall compliance with the ICE Detention Standards.

Review Summary:

The following review summarizes only those standards <u>not</u> in full compliance. Each Standard is identified and a short summary provided regarding standards or procedures not currently in compliance. It appears that the facility meets the standard but is requested to change its operating procedures to comply with language contained in the ICE Detention Standards. These are considered to be administrative changes that do not affect the daily operation or will have an insignificant affect on how the facility is operated. There were 24 Compliant Standards and 1 Deficient Standard. The following summary lists the standard that was found to be non-compliant.

DISCIPLINARY POLICY - DEFICIENT:

The Jail uses an informal disciplinary system. The Disciplinary Policy was not noted in the Detainee Handbook. The staff stated that they would review their policy and address this deficiency.

Overall, the Review indicated substantial compliance with the ICE Detention Standards. The staff we encountered was courteous, knowledgeable, and professional. They were very receptive to recommendations for changes in their procedures. During the review, no constraints or abnormal difficulties were encountered. Staff and detainees were cooperative and available to assist reviewers or to answer questions posed by the team.

Recommended Rating and Justification:

The result of our careful evaluation and review of the procedures and operation of the facility reflects their ability to provide for the proper and humane care of ICE detainees within the guidelines of the ICE Detention Standards. The facility's ability to directly supervise and control their detainee population's behavior has proven to be as effective. As a whole, I feel the documentation the team viewed supports the notion that the facility should be rated as **Acceptable**.

RIC Assurance Statement:

It is the opinion of the Reviewer In Charge that the findings of compliance and non-compliance are documented on the G-324a Inspection form and that it is supported by documentation in the review file.
