MEMORANDUM FOR: Tae D. Johnson
Assistant Director, Custody Management Division

THROUGH: Jay M. Brooks
Deputy Assistant Director, Detention Management Division

FROM: Rebecca Adducci 
Detroit Field Office Director

SUBJECT: Chippewa County Correctional Facility, Michigan –
Waiver Request

Purpose

Provide a waiver for Chippewa County Correctional Facility as it relates to the Detroit Field Office/Chippewa County Correctional Facility, pertaining to Environmental Health & Safety standard in detention facilities, section P, 1-4, within the 2000 National Detention Standards (NDS), which states each facility to have a barbershop.

Background: As of the March 12, 2015, Nakamoto Group Inc. Compliance Inspection of the Chippewa County Correctional Facility, "A licensed professional barber performs all barbering in the multipurpose day room. However, the area does not have sanitary facilities to meet sanitation requirements of the standard. There is no counter space for placing equipment during barbering and a stainless steel sink/toilet combination fixture is used as the source for running hot and cold water for cleaning and sanitizing barber attachments and tools".

Discussion: The Chippewa County Correctional Facility does not have a barbershop due to the footprint of the building being such that major construction would be necessary. In addition, the County will not be able to provide the financial resources to facilitate this. The County will provide a barber cart to the barber for counter space. The barber does bring in appropriate sanitation and cleaning solution.

Recommendation

I recommend authorization of a waiver for the Chippewa County Correctional Facility for the National Detention Standard (NDS), Section P, 1-4, Barbershop, due to the Chippewa County Correctional Facility being unable to provide for a designated barbershop room within the jail

FOR OFFICIAL USE ONLY (LAW ENFORCEMENT SENSITIVE)

facility. The Chippewa County Correctional Facility Jail does however, provide barber services in sanitary manner that complies with the sanitation standards portion of NDS standard P-4.
