Significant Incident Summary Worksheet

For Nakamoto to complete its review of your facility, the following information <u>must be completed</u> prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

Incidents	Description	Jan – Mar	Apr – Jun	Jul – Sept	Oct – Dec
Assault:	Types (Sexual ² , Physical, etc.)	Physical	Physical	Physical	Physical
Offenders on Offenders ¹	With Weapon	0	0	0	0
	Without Weapon	5	15	8	8

All findings (Deficient and At-Risk) require written comment describing the finding and what is necessary to meet compliance.

LCI Review Assurance Statement

By signing below, the Lead Compliance Inspector (LCI) certifies that all findings of noncompliance with policy or inadequate controls contained in the Inspection Report are supported by evidence that is sufficient and reliable. Furthermore, findings of noteworthy accomplishments are supported by sufficient and reliable evidence. Within the scope of the review, the facility is operating in accordance with applicable law and policy, and property and resources are efficiently used and adequately safeguarded, except for the deficiencies noted in the report.

Comments: The Sexual Abuse and Assault Prevention and Intervention Standard (SAAPI) was inspected during this inspection but is not referenced in the Standards Review Summary Report. The Standard was rated as Meets Standard for this inspection.

There were seven SAAPI allegations by ICE detainees since the last inspection. Following an investigation of each, three were classified as unfounded and three were classified as unsubstantiated. One female detainee on female detainee incident was classified as substantiated and the perpetrator was referred for prosecution for criminal sexual abuse.

There were no escapes or deaths during the inspection period; however, there was one serious suicide attempt. A 36-year old Hispanic female was admitted to the facility on 10/11/2018. At the time of admission, she reported no significant medical history and a mental health history of depression with no suicidal ideation and taking medication for the depression. As a result, the detainee was placed on the mental health caseload and, due to taking antidepressant medication was being evaluated by the psychiatrist every thirty days. On 12/15/2018, the detainee attempted to stab herself in the abdomen with a pencil. The detainee's roommate immediately activated the in-cell emergency button and security personnel immediately responded. The detainee stated she took such action because she was depressed about being detained beyond ninety days and desperately missed her children. The detainee was escorted to the medical department for an evaluation and physical examination which showed no injuries. The detainee was placed immediately on a one-to-one suicide watch in the padded cell within the booking department. The detainee made no further suicide attempts and was returned

Form G-324A SIS (Rev. 7/9/07)

to general population on 12/18/2019. The detainee remained stable in general population and was removed from the facility by ICE on 01/14/2019.

The sheriff's department periodically uses a canine unit for contraband detection but, per policy, never in the presence of ICE detainees. Less-than-lethal force devices such as blackjacks, sap gloves, mace, tear gas, or other chemical agents except OC (oleoresin capsicum) pepper spray are prohibited by policy. Choke holds or other unauthorized restraint positions are not authorized. The facility does not use Tasers. Oleoresin capsicum (OC) pepper spray is the only chemical agent authorized for use.

The facility reported twelve uses of force via incident reports for the inspection period. However, a review of nine of the incident reports substantiated that only confrontation avoidance techniques and the routine application of physical hand restraints were used. The facility completes a use-of-force incident report any time the special operations group is activated even if confrontation avoidance is successful and use of force is not necessary. There were three immediate uses of force involving two ICE detainees. In all three incidents the detainee involved attempted to shove or push by an officer. Officers used only the force necessary to control the situation. No chemical agents were used and there were no injuries to either staff or detainees. Detainees were examined by medical staff. An after-action review was documented for each incident; however, the review by the OIC occurred several days after the incident and not the next working day as required by the standard.

Per the accreditation sergeant, the statistics referenced on page two, the Significant Incident Summary Worksheet, pertain only to ICE detainees.
