Significant Incident Summary Worksheet

For Nakamoto to complete its review of your facility, the following information must be completed prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

Comments: The Sexual Abuse and Assault Prevention and Intervention Standard 2011 was inspected during this inspection but is not referenced in the Standards Review Summary Report. The Standard was rated as Meets Standard for this inspection.

There were nine allegations of sexual abuse/assault during this inspection period. Eight of the allegations were detainee-on-detainee. The allegation behaviors ranged from sexual remarks to unwanted exposure and unwanted touching. Three allegations were substantiated and five were unfounded. One allegation was staff-on-detainee involving an ICE agent which occurred seven months prior to the detainee's transfer to this facility. The allegation was referred to ICE. All the case files were reviewed; procedures conducted by medical and detention staff were found to comply with the requirements of the standard.

There were no deaths or serious suicide attempts by an ICE detainee during this inspection period. There were two ICE detainee hunger strikes.

Policy allows for the use of Tasers on an ICE detainee. Oleoresin capsicum (OC) pepper spray is the only chemical agent authorized for use. This facility uses canines for the purpose of contraband searches, but not in the presence of detainees.

There have been twenty-two use of force incidents involving ICE detainees since the last annual inspection. All twenty-two incidents involved immediate use of force. Associated with these uses of force, there were sixteen uses of the restraint chair, two uses of OC and one use of the taser. Eleven of the incidents involved three detainees who were exhibiting self-injurious behavior and refusing staff orders. The remaining eleven incidents involved detainees exhibiting aggressive behavior towards staff, self-injury and refusing

[REDACTED]

orders. The majority of detainees involved in the incidents exhibited mental health issues and were in observation or suicide watch cells. All twenty-two incident packages were reviewed and were found to fully document the incidents and that medical evaluation/treatment was prompt. Review of the incident reports confirmed the use of force in each incident was appropriate for the circumstances faced by the staff. All the incidents were reviewed in a timely manner by the facility supervisors and managers.

There were no escapes or escape attempts during this inspection period.
