Significant Incident Summary Worksheet

For Nakamoto to complete its review of your facility, the following information must be completed prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

Comments: The Sexual Abuse and Assault Prevention and Intervention Standard was inspected during this inspection but is not referenced in the Standards Review Summary Report. The Standard was rated as Meets Standard for this inspection.

There were no allegations of sexual abuse, assault or harassment involving ICE detainees since the previous inspection. The facility had fourteen allegations of staff on non-ICE detainee sexual abuse, harassment or assault. There was one allegation of non-ICE detainee on non-ICE detainee sexual assault. All allegations were responded to and investigated promptly. Of the fourteen staff on detainee allegations, seven were determined to be unsubstantiated and seven were determined to be unfounded. The one allegation of detainee on detainee assault was determined to be substantiated and the detainee assailant was prosecuted for the offense and is awaiting sentencing .

There were no ICE detainee deaths or serious suicide attempts. The facility experienced one completed suicide of a non-ICE detainee since the previous inspection. The suicide involved a 36-year-old Caucasian male county inmate who arrived at the facility four days earlier. The inmate initially refused to answer all medical and mental health intake screening questions and as a result, was placed on constant observation suicide watch. Over the next two days, he was evaluated by mental health providers and eventually cooperated with medical and mental health screening procedures. He was subsequently released from constant observation and permitted to be housed in the general population. Within 24 hours, the detainee was found unresponsive in his cell as a result of a suicide attempt by hanging. He was transported to the local hospital where he was placed on a ventilator. He died approximately 48 hours later, when the inmate's family consented to discontinue the use of the ventilator.

There were no immediate or calculated use of force incidents involving ICE detainees during this inspection period. Oleoresin capsicum/pepper spray is authorized for use on ICE detainees by shift supervisors, members of the correctional emergency response team (CERT) and transportation officers when needed. Tasers are available in the armory, but are not routinely carried by staff. The facility does not have a canine unit.
