Significant Incident Summary Worksheet

For The Nakamoto Group to complete its review of your facility, the following information must be completed prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

 Does Not Meet Standards

Comments: This inspection was conducted to determine the overall compliance with the ICE Performance-Based National Detention Standards (PBNDS) 2011. The following are the PBNDS 2011 additions/changes to the standards listed on page three:

- Medical Care (Women), a new standard, was Not Applicable;
- Classification System is now titled Custody Classification System;
- Suicide Prevention and Intervention is now titled Significant Self-Harm and Suicide Prevention and Intervention;
- Escorted Trips for Non-Medical Emergencies is now titled Trips for Non-Medical Emergencies;
- News Media Interviews and Tours is now titled Interviews and Tours;
- Transfer of Detainees is now titled Detainee Transfers

There were no deaths and no serious suicide attempts during the past year. During this inspection period, there were two SAAPI allegations, both of which were unsubstantiated. In both cases, the victims were protected and the investigations, follow-up, and documentation were completed as required by the standard.

The facility does not have a canine unit. Tasers are not used at this facility. Chemical agents are carried by authorized users and will be used on ICE detainees if needed. There were no escapes during the inspection period.

There were four immediate physical responses to detainee resistance involving ICE detainees. In one instance, an officer deployed a baton strike on a detainee when the detainee would not acquiesce to the staff attempts to control him after he had assaulted an officer. Each of the remaining three incidents involved detainees on whom chemical agents had to be deployed to bring them under control. All incidents were reviewed and it was determined that the force was justified in each. Medical evaluations were conducted after each incident and there were no serious injuries to staff or detainees.

The significant incident summary worksheet information represents ICE detainees only. The grievance numbers reported on the summary worksheet are not accurate, as the facility system automatically includes detainee request forms as grievances, and the facility did not separate them for the inspection team.
