Significant Incident Summary Worksheet

For ICE to complete its review of your facility, the following information <u>must be completed</u> prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE detainees at your facility.

Comments: The Sexual Abuse and Assault Prevention and Intervention (SAAPI) Standard was inspected during this inspection but is not referenced in the Standards Review Summary Report. The standard was rated as Meets Standard for this inspection. The information provided on the Significant Incident Summary Worksheet references the ICE detained population.

There were no ICE detainee SAAPI allegations during the inspection period. There were no ICE detainee deaths, serious suicide attempts or escapes during the inspection period. There was one non-ICE detainee suicide during the inspection period. The inmate was a 36-year-old white male who was found unresponsive by a correctional officer. Cause of death was ruled self-inflicted strangulation.

There were three immediate use of force incidents involving ICE detainees. A Taser was used in one of the incidents. The facility has three Tasers on the equipment inventory. Reports confirmed that force was applied within guidelines of the standard. The medical evaluations were timely. Detainees were treated for minor injuries.

The use of unsafe types of force such as choke holds, carotid control holds and neck restraints are not authorized. Taser use is authorized on ICE detainees, when necessary. The facility does not have a canine unit. There are no chemical agents in the facility.
