Significant Incident Summary Worksheet

For The Nakamoto Group to complete its review of your facility, the following information <u>must be completed</u> prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

Incidents	Description	Jan – Mar	Apr – Jun	Jul – Sept	Oct – Dec

LCI Review Assurance Statement

By signing below, the Lead Compliance Inspector (LCI) certifies that all findings of noncompliance with policy or inadequate controls contained in the Inspection Report are supported by evidence that is sufficient and reliable. Furthermore, findings of noteworthy accomplishments are supported by sufficient and reliable evidence. Within the scope of the review, the facility is operating in accordance with applicable law and policy, and property and resources are efficiently used and adequately safeguarded, except for the deficiencies noted in the report.

Recommended Rating:	⋈ Meets Standards
	☐ Does Not Meet Standards

Comments: This inspection was conducted to determine overall compliance with the ICE Performance-Based National Detention Standards 2011(42 standards) which include the following additions/changes to the standards listed on page three:

- Medical Care (Women), a new standard, was rated Not Applicable;
- Classification System is now titled Custody Classification System;
- Suicide Prevention and Intervention is now titled Significant Self-Harm and Suicide Prevention and Intervention;
- Escorted Trips for Non-Medical Emergencies is now titled Trips for Non-Medical Emergencies;
- News Media Interviews and Tours is now titled Interviews and Tours, and;
- Transfer of Detainees is now titled Detainee Transfer.

On 3/2/2019, a detainee escaped from the facility by climbing over the perimeter fence adjacent to the recreation yard. The escape was discovered within two hours and the detainee was recaptured thirteen hours after the escape. The investigation report and after-action documentation were reviewed. The escape route was observed. The detainee who escaped was low security and "acted out of impulse," according to the report. Procedural errors documented in the investigative report related to the perimeter intrusion detection system, searches of the recreation yard after recreation is completed, procedures for refueling perimeter vehicles and perimeter vehicle officer responsibilities. As a result of the internal investigation, one employee was terminated and two employees remain on suspension. Corrective actions for procedural deficiencies were observed during this inspection.

There was a suicide on 7/10/2018. The medical record was not available as IHSC did not release or surrender any medical records to the facility when their contract was cancelled. A 40-year-old Mexican male was found hanging in his segregation cell during 10:34 p.m. rounds. Socks were found tied around his neck and attached to the upper tier. He was cut down by security staff and CPR was initiated. Medical staff responded and continued CPR. EMS arrived and assumed the care of the detainee. They exited the facility at

11:06 p.m. and transported the detainee to Southwest Georgia Regional Hospital, where he was pronounced dead at 11:29 p.m. An autopsy was completed. The cause of death was hanging; the manner of death was suicide. A mortality review was held, as well as, a critical incident debriefing.

During this inspection period, there were 32 use of force incidents. Of those incidents, nineteen were immediate and thirteen were calculated. The calculated uses of force were cell extractions. The immediate use of force situations involved staff responding to detainee fights, detainees refusing to follow staff directions, as well as, two detainee assaults on staff that resulted in detainees being restrained. There were fifteen incidents where oleoresin capsicum (OC)/pepper spray was used by staff to control the situation. All use of force situations were immediately followed by medical examinations for staff and detainees. Actions were properly documented and reviewed. All reports and video reviews indicated that force was applied within guidelines of the standard. There were no serious detainee or staff injuries. All use of force incidents were reviewed by senior staff.

There were thirteen allegations of sexual abuse/assault since the last inspection. All involved ICE detainees only. The allegations ranged from threats and intimidation to inappropriate touching to one case of penetration. Two allegations are currently under investigation; three were substantiated; seven were unsubstantiated; and one was unfounded. All policies and procedures regarding response to allegations of sexual assault were followed.

There have been 38 hunger strikes since November 2019. Any documentation regarding total number of hunger strikes since the last inspection is unavailable as that information was not released by the prior vendor (IHSC contract ended 11/11/2019). The majority of hunger strikers stated their reason for the strike was: to speak to ICE or be deported (31); refused to say (5); I depressed (1); and death in the family (1). Policy and procedure were followed in the management of the hunger strikes. No hunger strikers required outside medical care.

The facility does not have a canine unit for contraband detection. The only chemical agent in the facility is OC (oleoresin capsicum)/pepper spray. Only trained personnel are authorized to use chemical agents. The use of unsafe types of force such as choke holds, carotid control holds and neck restraints are prohibited by policy. Tasers are not used.
