Current Inspection

I. Areas of Noncompliance

The following areas of noncompliance were identified:

1.2 Environmental Health & Safety

- **Centers will perform preventive maintenance and regular inspections to ensure timely emergency repairs or replacement and to prevent dangerous and life-threatening situations.**

Finding: On 6/25/2021, a staff member's foot went through the floor in one of the court rooms. The building was subsequently closed. An incident report was completed regarding this issue and hearings have been moved to another location until repair of the floor can be completed.

On 6/29/21, a soft spot on the floor in the Visitation area was found. The Compliance Manager stated that the floor had been repaired, and the Acting AFOD indicated that the floor should be inspected by a professional to check the integrity of the repair.

Mitigation: The Center must ensure that regular maintenance checks are performed to identify issues before they become a safety hazard. Necessary repairs must be made in a timely manner to

prevent injuries.

II. Areas of Compliance with Issues Identified

There were no areas of compliance with issues identified during this inspection.
