Significant Incident Summary Worksheet

For The Nakamoto Group to complete its review of your facility, the following information <u>must be completed</u> prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

Recommended Rating:

Comments: This inspection was conducted to determine overall compliance with the ICE Performance-Based National Detention Standards (PBNDS 2011) which include the following additions/changes to the standards listed on page three:

- Medical Care (Women), a new standard, was rated Meets Standard;
- Classification System is now titled Custody Classification System;
- Suicide Prevention and Intervention is now titled Significant Self-Harm and Suicide Prevention and Intervention;
- Escorted Trips for Non-Medical Emergencies is now titled Trips for Non-Medical Emergencies;
- News Media Interviews and Tours is now titled Interviews and Tours, and;
- Transfer of Detainees is now titled Detainee Transfer.

There were no escapes, deaths or serious suicide attempts during the inspection period. The facility does not have a canine unit for contraband detection. The only chemical agent used at the facility is OC (oleoresin capsicum)/pepper spray. Only trained personnel are authorized to use chemical agents. The use of unsafe types of force such as choke holds, carotid control holds and neck restraints are prohibited by policy. Tasers are used.

There was one immediate use of force incident reported during the inspection period. A Taser was used on an ICE detainee who was assaulting another detainee and could not be restrained. There were no injuries to staff. Medical staff removed the probes, checked vitals and dressed the Taser wounds. The incident was reviewed by the shift supervisor and found to be in compliance with policy.

During the inspection period there were two allegations of detainee on detainee sexual assault or abuse. A female detainee was charged with abusive sexual contact on another female detainee. The incident was investigated and found "substantiated". The female victim declined to file criminal charges. A male detainee threatened to sexually assault another male detainee if he did not payback the money he owed. The incident remains under investigation with the disposition pending.

The information on page 2, Significant Incident Summary Worksheet, pertains only to ICE detainees. The facility reported no referrals for outside medical or psychiatric care due in large part to the medical department's record keeping system which does not segregate the information by ICE and non-ICE. During reviews of medical records, at least twelve cases of medical referrals were noted for the previous six months of the inspection period. Section H of the Worksheet indicates the facility has significant litigation pending. The litigation pertains to medical care involving non-ICE detainees. No additional information was provided.
