Significant Incident Summary Worksheet

For Nakamoto to complete its review of your facility, the following information <u>must be completed</u> prior to the scheduled review dates. The information on this form should contain data for the past twelve months in the boxes provided. The information on this form is used in conjunction with the ICE Detention Standards in assessing your Detention Operations against the needs of the ICE and its detained population. This form should be filled out by the facility prior to the start of any inspection. Failure to complete this section will result in a delay in processing this report and the possible reduction or removal of ICE' detainees at your facility.

All findings (Deficient and At-Risk) require written comment describing the finding and what is necessary to meet compliance.

LCI Review Assurance Statement

By signing below, the Lead Compliance Inspector (LCI) certifies that all findings of noncompliance with policy or inadequate controls contained in the Inspection Report are supported by evidence that is sufficient and reliable. Furthermore, findings of noteworthy accomplishments are supported by sufficient and reliable evidence. Within the scope of the review, the facility is operating in accordance with applicable law and policy, and property and resources are efficiently used and adequately safeguarded, except for the deficiencies noted in the report.

Recommended Rating: Good Acceptable Deficient At-Risk		

Comments: The Sexual Abuse and Assault Prevention and Intervention Standard was inspected during this inspection but is not referenced in the Standards Review Summary Report. The Standard was rated as Meets Standard for this inspection. Since the previous inspection, the facility had two allegations sexual abuse. One involved a non-ICE detainee alleging detainee on detainee sexual abuse. After investigation, it was determined to be unfounded. The second allegation involved an ICE detainee claiming detainee on detainee sexual abuse. The allegation was investigated and determined to be unsubstantiated. There were no allegations of sexual abuse, assault or harassment involving injury or penetration since the previous inspection.

There were no ICE detainees placed on suicide watch and there were no ICE detainees placed on suicide watch and there were no ICE detainee serious suicide attempts.

During this inspection period, there were nine uses of force involving ICE detainees. Three involved calculated use of force (two restraint chair placements for safety and well-being of the detainee, and one for aggressive behavior by the detainee). Videos of these incidents were not available. The remaining six were immediate uses of force (five were due to detainee failure to obey, and one for fighting). Each of the immediate uses of force resulted in the use of Oleoresin Capsicum (OC)/pepper spray. All reports indicated that force was applied within guidelines of the standard. The medical evaluations were timely. One detainee involved in the fight was transported to the hospital for treatment and returned to the facility. Oleoresin Capsicum (OC)/pepper spray is available for use to control detainees, if necessary. Tasers and canines are not used to control ICE detainees.

There was one escape since the last inspection. On 11/16/2017 three male non-ICE detainees who were in the law library escaped through the roof. One detainee was captured soon after the escape and the other two were captured ten months later. All three are currently in custody.
