Secure Communities Crash Course 2009

For Official Use Only

Agenda

- What is Secure Communities?
- What is the Criminal Alien Enforcement Lifecycle?
- How did Secure Communities come about?
- What are the Secure Communities Strategic Goals?
- What is Interoperability?
- Why is it important?
- How is it being deployed?
- What are our reporting requirements and funding uses?
- How is Secure Communities organized?
- What does Secure Communities do other than Interoperability deployment?
- What are our results to date?
- How can I learn more?

What is Secure Communities?

 Secure Communities is a program management office (PMO) leading ICE's effort to modernize and transform the criminal alien enforcement model through technology, integration, and information sharing. Projects sponsored, funded, monitored or reported on by Secure Communities cross all operational lines of ICE.

Secure Communities Mission

 The Secure Communities initiative seeks to improve public safety by implementing a comprehensive, integrated approach to identify and remove criminal aliens from the United States. The Secure Communities PMO coordinates all ICE planning, operational, technical, and fiscal activities devoted to transforming, modernizing, and optimizing the criminal alien enforcement process (lifecycle).

Criminal Alien (CA) Enforcement Lifecycle

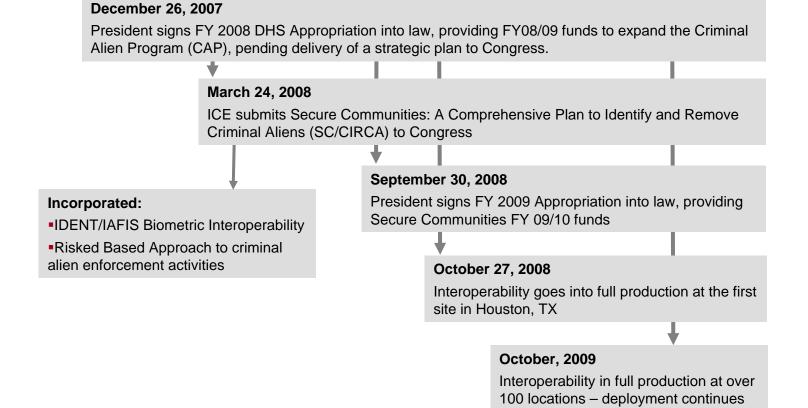

Description of the Criminal Alien Enforcement Lifecycle

Phase	Description	
Identify	This phase consists of the processes that allow ICE to use automated biometric queries to identify, classify, and prioritize criminal aliens.	
Apprehend	This phase consists of the processes ICE uses to arrest or otherwise take custody of criminal aliens for detention and, if judged removable, removal from the country.	
Detain	This phase consists of the processes required to detain a criminal alien once in ICE custody.	
Process	This phase consists of the due process legally required to authorize the removal of a criminal alien from the United States.	
Remove	This phase consists of all the processes required to affect the removal of a criminal alien from the United States, once the individual is judged or otherwise determined to be removable.	
Track	Track is a supporting information process that continues throughout all phases of the Criminal Alien Enforcement Lifecycle Each step of the alien's progress is carefully tracked and recorded, from identification through removal.	

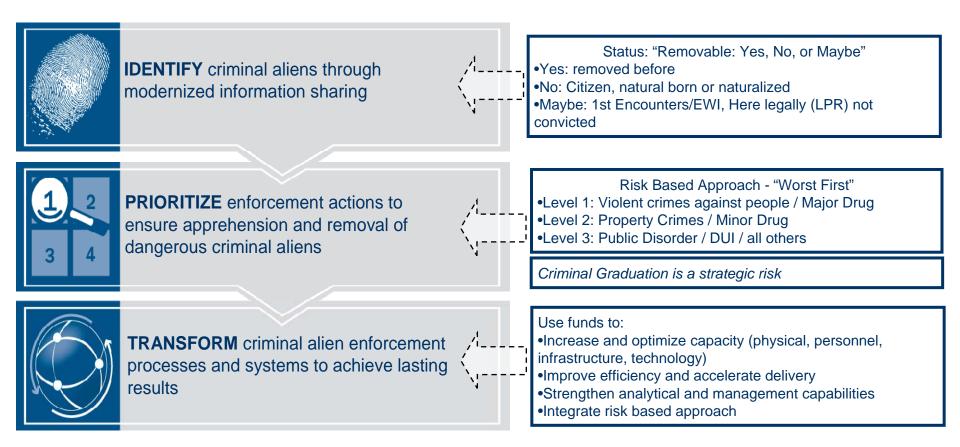

Formation of Secure Communities

Congress provided the U.S. Department of Homeland Security (DHS), Immigration and Customs Enforcement (ICE) with funding in FY 2008 to "improve and modernize efforts to identify aliens convicted of a crime, sentenced to imprisonment, and who may be deportable, and remove them from the United States once they are judged deportable."

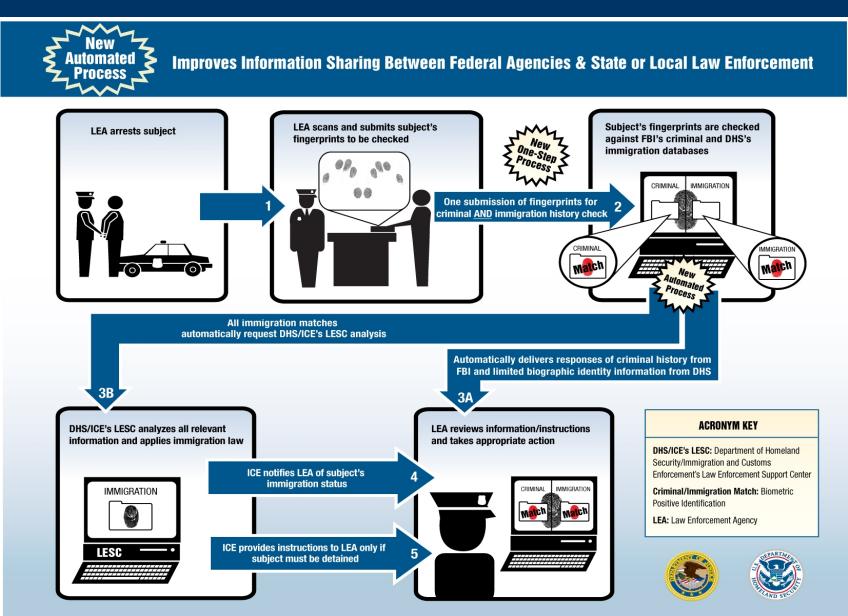

The Secure Communities Strategic Plan is built on three goals:

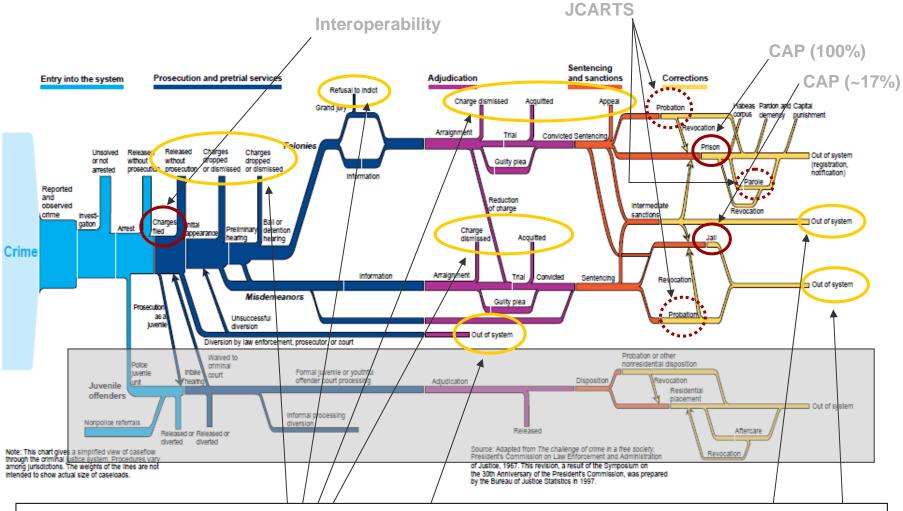

Why is Interoperability important? Criminal Justice Process – ICE "Touch Points"

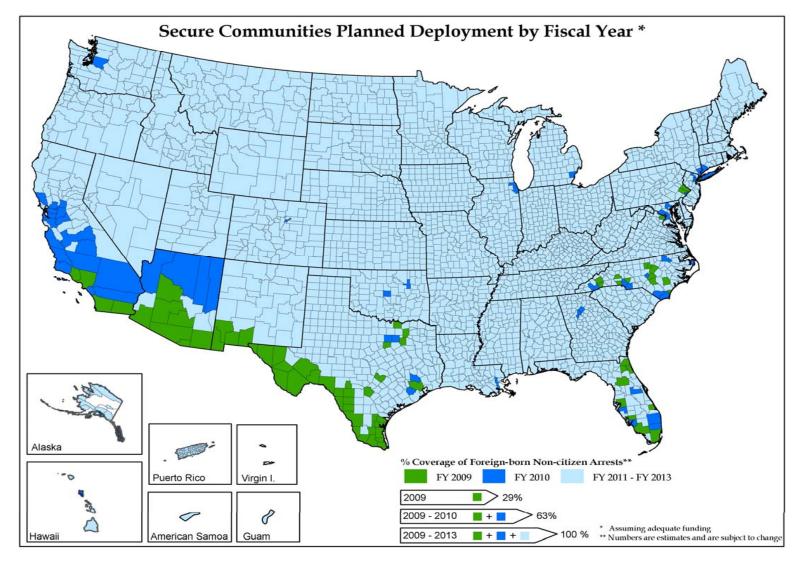

Without Interoperability, these are points where a criminal aliens with priors convictions can leave the system undetected by ICE

How is Interoperability being deployed?

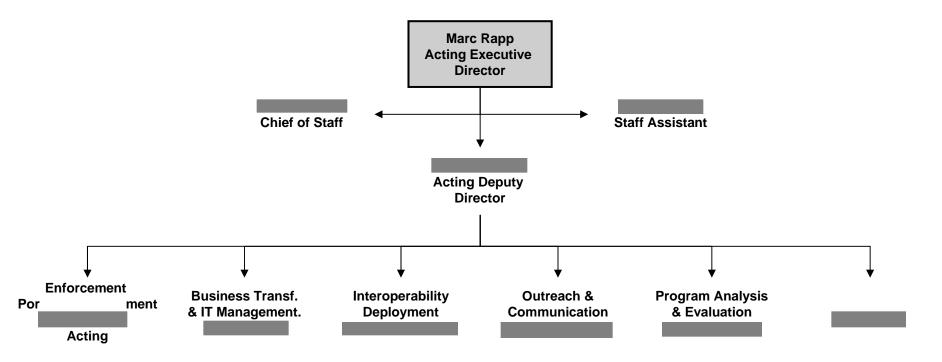

*subject to change

- Congress appropriated Secure Communities two year funds in FY2008 Focused reporting on the "incarcerated" scope
- SC received additional two year funds in FY2009 Increased scope to the criminal aliens "at-large"
- In addition, with the FY2009 funding, the SC PMO was given the responsibility to report quarterly to Congress on all ICE activities related to the \$1.4 billion of planned obligations toward criminal alien enforcement in FY2009 regardless of funding source
- Of the funds appropriated for Secure Communities approximately 31% is planned for IT investments. In some cases, SC funds an entire project and in other cases it provides additional funding to existing projects to add capabilities or to accelerate schedules
- The remaining 69% is targeted at enforcement efforts (agents, personnel, related items).

- All reporting for ICE efforts to process criminal aliens
- All communications and outreach associated with the initiative
- Modeling
 - Criminal Alien Population Projection Analysis (CAPPA)
 - Strategic Decision Making Model
 - Network Optimization
 - Deployment Optimization
- IT Systems New, improved, faster, stronger, better
- Strategic funding of operational resources

Progress to date

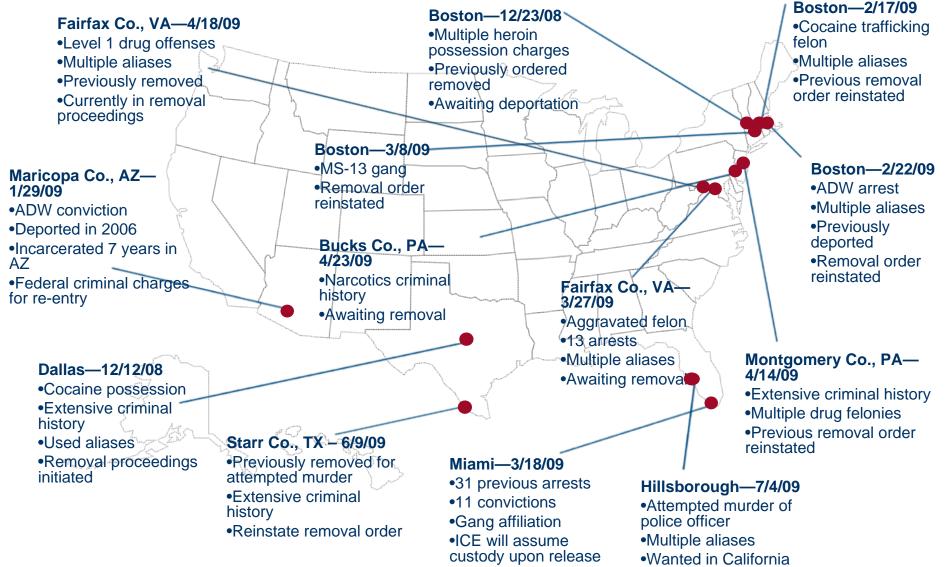

• As of September 29, 2009, automatic biometric identification is deployed in 88 jurisdictions within 9 states: Arizona, California, Florida, Massachusetts, North Carolina, New Mexico, Pennsylvania, Texas, Virginia

Cumulative National Statistics from October 27, 2008 – August 31, 2009

- 672,436 fingerprints have been submitted through interoperability
- 82,890 submissions have resulted in an IDENT match
- 7,702 IDENT matches identified criminal aliens convicted of level 1 offenses
- **71,491** IDENT matches identified criminal aliens convicted or charged with level 2 & 3 offenses
- **16,631** Detainers were issued after an Interoperability match
- 1,101 criminal aliens convicted of Level 1 offenses were removed

Secure Communities and partners have achieved nationwide success

Additional Information

DHS Organization

How is Secure Communities different from 287(g)?

Secure Communities is complementary to 287(g) or any other ICE program on the ground in a state, tribal or local jurisdiction.

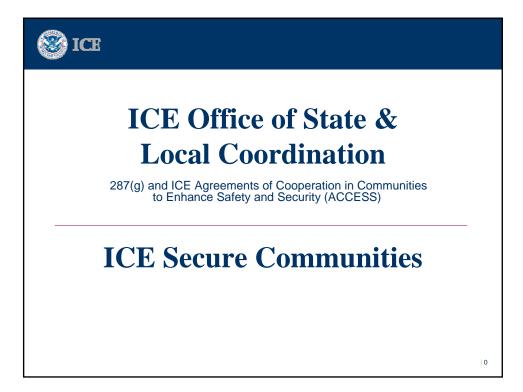

Secure Communities

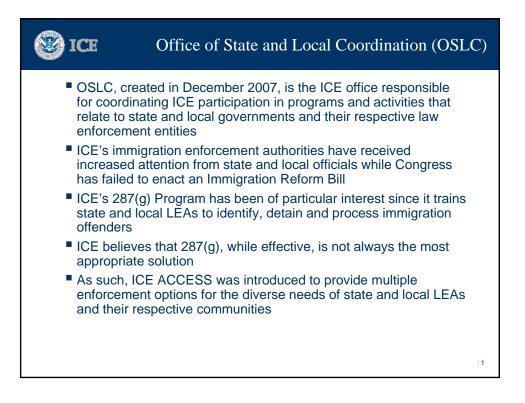

- Secure Communities is fundamentally different from other ICE programs, primarily because under Secure Communities, state and local law enforcement officials are not authorized to enforce immigration laws on behalf of ICE. ICE officials make immigration status determinations and take appropriate action under the law, consistent with ICE policies and regulations.
- The Secure Communities initiative combines biometric identification technologies currently in use by the FBI and other parts of DHS. This technology, known as IDENT/IAFIS **Interoperability,** is deployed throughout the country on a risk-based approach. Information sharing between federal, state, tribal and local law enforcement agencies enables early identification of criminal aliens as they are booked into local custody.
- The technology enables local Law Enforcement Agencies (LEAs) to initiate an integrated records check of criminal history *and* immigration status for individuals in their custody as part of their standard booking process.
- Interoperability increases the speed, accuracy and volume by which ICE identifies dangerous criminal aliens. Biometric identification reliably and accurately **confirms** identity vs. **establishes** identity.
- Interoperability can be activated at little to no cost to a local law enforcement agency and with little or no change to their current operating procedures.
- Interoperability once installed within a jurisdiction, provides the immigration status on those that may not make it to a jail, but to all booking locations in the county
- Prior to interoperability the LEA was notified when a match occurred in IAFIS. Now in addition to the IAFIS response, when a match occurs in IDENT, ICE and the LEA that encountered the individual are automatically notified, in parallel. Once an arrested individual is identified as an alien, the local ICE office determines the appropriate response based on the nature of the crime, the individual's criminal history, and the current immigration status. In order to manage the expected influx of newly identified serious criminal aliens, prioritized enforcement action will be initiated against the most serious violators first.

287(g) Program

- The 287(g) program allows for state and local law enforcement agencies to enter into a partnership with ICE, under a joint Memorandum of Agreement (MOA), in order to receive delegated authority for immigration enforcement within their jurisdictions.
- Currently, ICE 287(g) MOAs focus on one of two distinct models: (1) the jail enforcement officer (JEO) model; and (2) the task force officer (TFO) model.
- Agencies participating under the JEO model are working in a detention facility setting and are able to identify and process criminal aliens of interest to ICE. The JEO model works within a jail or prison setting and simply incorporates 287(g) immigration authority functions into their existing booking process. Officers assigned to the JEO model are supervised by ICE when performing immigration enforcement functions.

• Agencies participating under the TFO model are working in an ICE-led task force and are able to identify, process and prosecute criminal aliens of interest to ICE. Officers assigned to a TFO model are supervised by ICE and work to accomplish the mission of ICE and the law enforcement agency they represent.

SECURE COMMUNITIES FACT SHEET

Secure Communities: Mission

Secure Communities is a comprehensive Department of Homeland Security (DHS) initiative to modernize the criminal alien enforcement process. It supports public safety by strengthening efforts to identify and remove the most dangerous criminal aliens from the United States. Congress appropriated \$1.4 billion to U.S. Immigration and Customs Enforcement (ICE) for criminal alien enforcement efforts.

Secure Communities is built on three pillars that address the frequent challenges associated with accurately identifying and successfully removing criminal aliens from the United States.

Identify criminal aliens through modernized information sharing

Priori ensure danger

Prioritize enforcement actions to ensure apprehension and removal of dangerous criminal aliens

Transform criminal alien enforcement processes and systems to achieve lasting results

IDENTIFY The Challenge:

Arrestees often use aliases and furnish other false biographic data, which can make it difficult to properly determine their immigration status. Relying on this biographic data alone slows federal officials' ability to accurately and efficiently identify the immigration history of criminals booked into local custody, and on probation and parole.

The Solution: Modernize Criminal Alien Identification Using Biometrics

New technology being deployed across the country enables the criminal alien's fingerprints to be checked against DHS's biometric database. This technology and the use of biometrics helps to more accurately and efficiently confirm a suspect's identity because, unlike a name or date of birth, biometrics are almost impossible to forge. ICE, along with the FBI and DHS's US-VISIT Program provide the technology to help local law enforcement agencies (LEAs) complete an **integrated records check** to determine both the criminal history and immigration status of individuals in their custody.

A single submission of fingerprints as part of the normal criminal booking process automatically checks for information in both the Integrated Automated Fingerprint Identification System (IAFIS) of the FBI's Criminal Justice Information Services (CJIS) Division and the Automated Biometric Identification System (IDENT) of DHS's US-VISIT Program.

The LEA continues to be notified when there is a positive identification within IAFIS. Now, both ICE and the LEA can be notified when a match occurs in IDENT.

ICE evaluates each case to determine the individual's immigration status and communicate their findings to local law enforcement **within a few hours.**

SECURE COMMUNITIES FACT SHEET

PRIORITIZE The Challenge:

The size, location, and characteristics of the nation's criminal alien population are based on estimates, making it difficult to strategically assess operational needs and deploy resources to identify and remove criminal aliens.

The Solution: Prioritize Enforcement Actions

Secure Communities is using a **risk-based approach** to prioritize enforcement actions involving criminal aliens. ICE is focusing efforts first and foremost on the most dangerous criminal aliens currently charged with, or previously convicted of, the most serious criminal offenses. ICE will give priority to those offenses including, crimes involving national security, homicide, kidnapping, assault, robbery, sex offenses, and narcotics violations carrying sentences of more than one year.

By prioritizing the removal of the most dangerous criminals, Secure Communities enables ICE to heighten public safety while reducing disruption to communities and law-abiding immigrant families.

Deployment Strategy:

Beginning in October 2008, ICE prioritized deployment of biometric identification capability to high-risk jurisdictions. Continued deployment plans project nationwide coverage by 2013. For more information including current status and recent successes, please visit our website at: www.ICE.gov/Secure_Communities

TRANSFORM The Challenge:

The deployment of biometric identification capability to more than 30,000 local jails and booking locations nationwide will dramatically increase the number of dangerous criminal aliens coming into ICE custody. That means ICE must boost its capabilities to arrest, process, detain, and ultimately remove aliens from the United States. Finding solutions to identify, locate, and detain criminal aliens currently considered at-large is a high priority.

The Solution: Transform ICE Business Processes and Systems

To meet these demands, ICE is working to **optimize capacity** by modernizing and expanding detention space, transportation resources, and staff. Automated systems and greater **process efficiency** will speed the removal of criminal aliens from the United States, reducing the amount of time they spend in ICE custody. Some of the modernization and process enhancements include:

- Video teleconferencing to conduct interviews and immigration hearings
- Computer technology to track the use of detention beds and transportation systems
- Integrated case and detainee management systems
- Working groups to address identifying, locating and detaining criminal aliens who are currently at-large

These enhancements to the processes and systems ICE uses to manage its criminal alien caseload are designed to **strengthen ICE capabilities** to:

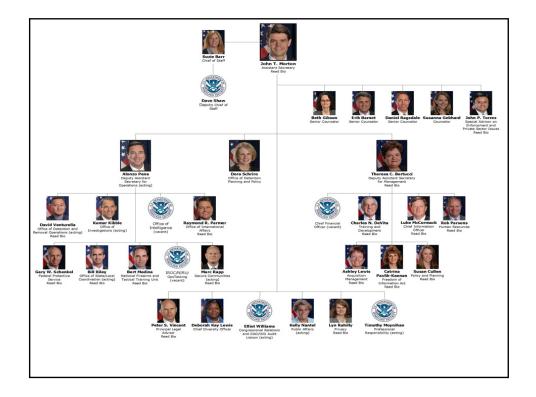

- Assess future needs for detention beds, transportation, and staffing
- Optimize ICE's overall operating efficiency

ICE SURGE 2009

- The ICE HQ National Gang Unit has initiated intelligence driven national gang enforcement operations to combat public safety and national security threats by transnational criminal street gangs within U.S. communities. As part of Operation Community Shield (OCS), ICE Specialized Urban Response Gang Enforcement (SURGE) 2009 activities commenced on March 27, 2009, and will continue until September 19, 2009.
- As of the seventeenth week (ending July 24, 2009) of ICE SURGE 2009, ICE agents, in conjunction with law enforcement counterparts, have arrested 970 gang members and associates during enforcement operations conducted in 70 U.S. cities. In addition, ICE agents arrested, or assisted in the arrest of 190 other individuals for criminal or administrative violations of state or federal law. In total, 1160

- 5. Interoperability Data Definitions

1. <u>Secure Communities Overview</u>

- Secure Communities is ICE's strategy to modernize current processes by better identifying criminal aliens through the use of biometric technology, prioritizing our enforcement efforts in order to focus on those posing the greatest threat to our communities, and transforming enforcement operations to become more efficient and effective through the long-term.
- Secure Communities' strategy is built on three pillars:
 - *Identify criminal aliens* through modernized technology, continual data analysis, and timely information sharing with a broad range of law enforcement partners
 - *Prioritize enforcement actions* to apprehend and remove criminal aliens who pose the greatest threat to public safety
 - *Transform criminal alien enforcement* to efficiently identify, process, and remove criminal aliens from the United States

2. Funding Information

- December 26, 2007
 - President Bush signs FY 2008 DHS Appropriation into law, providing Secure Communities 200
 million in two-year funds to identify incarcerated criminal aliens, marking the beginning of the
 Secure Communities initiative
 - Secure Communities is responsible for reporting on over 1 billion of ICE-wide funds used to address the criminal alien challenge
- September 30, 2008
 - President Bush signs FY 2009 Appropriations into law, providing Secure Communities an additional 150 million in two-year funds, and expands the scope to address the at-large criminal alien population
 - Secure Communities is responsible for reporting on over 1 billion of ICE-wide funds used to address the criminal alien challenge
- October 28, 2009
 - President Obama signs FY 2010 Appropriations Act, providing Secure Communities with additional 200 million in two-year funds
 - Secure Communities is responsible for reporting on over 1 billion of ICE-wide funds used to address the criminal alien challenge

4. <u>Interoperability Metrics</u>

- 12% of all Interoperability transmissions have resulted in an IDENT match since 10/27/2008
- 9% of all IDENT matches have resulted in the identification of an alien charged with or convicted of a Level 1 offense since 10/27/2008.
- 85% of all IDENT matches have resulted in the identification of an alien charged with or convicted of a Level 2 or Level 3 offense since 10/27/2008
- 6% of all IDENT matches have resulted in U.S. Citizen (USC) identification since 10/27/2008

Cumulative Interoperability Statistics (From October 27, 2008 through December 31, 2009)						
Interoperability Submissions	IDENT Match	es Arrested or Detainers Issued after Interoperability Hit*		Issued after Removals and Returns**		
	Level 1 Matches±	14,667	Level 1	7,558	Level 1	2,944
	Level 2/3 Matches	131,801	Level 2/3	31,055	Level 2/3	19,788
1,340,409	Subtotal	146,468	Total 38,6			
	USC Matches	9,053		38,613	Total	22,732
	Total IDENT Matches	155,521				

Fiscal Year 2010 Interoperability Statistics (From October 1, 2009 through December 31, 2009)						
Interoperability Submissions	IDENT Matches		Arrested or Detainers Issued after Interoperability Hit*		Removals and Returns**	
	Level 1 Matches±	5,178	Level 1	2,403	Level 1	619
514,646	Level 2/3 Matches	45,693	Level 2/3	9,369	Level 2/3	3,712
	Subtotal	50,871	Total			
	USC Matches	4,322		11,772	Total	4,331
	Total IDENT Matches	55,193				

 $\pm\,$ Aliens who are charged with or convicted of a Level 1 offense

* Number of detainers issued is based on the month that the individual was checked via Interoperability, not the month the detainer was issued

** Aliens who were charged with or convicted of a Level 1, Level 2, or Level 3 crime

	Interoperability Data Definitions
Interoperability Submissions	All fingerprint submissions that have been processed through interoperability.
IDENT Matches	Individuals that had a match in the IDENT system and who were charged with or convicted of any level offense. These matches include USCs that have records in IDENT. IDENT Matches include duplicate entries for cases as an individual may go through interoperability several times for one unique case.
Level 1 Matches±	Aliens that had a match in the IDENT system and who were charged with or convicted of a Level 1 offense. Level 1 Matches include duplicate entries for cases as an individual may go through interoperability several times for one unique case.
Enforcement Actions	
Arrested or Detainers Issued after Interoperability Hit*	Aliens that had been arrested or had detainers that were issued by ICE after IDENT/IAFIS Interoperability provided a response on the individual's immigration status to the field office. The detainer and arrest date are based on the month that the individual was checked via Interoperability, not the month the detainer was issued or arrest occurred.
Booked into ICE Custody	Aliens that had a match in IDENT, were charged with or convicted of a crime, and booked into ICE custody. The date the individual is booked into ICE custody is based on the month that the individual was checked via Interoperability, not the month they were booked into ICE custody.
Outcomes	
In Removal Proceedings	Aliens that had a match in IDENT, were charged with or convicted of a crime, and currently have a case in removal proceedings.
Removals and Returns**	Aliens that had a match in IDENT, were charged with or convicted of a level 1, level 2, or level 3 crime, and voluntary returned to their country of origin or was removed.
Other Definitions	
Activation Date	The date that interoperability was deployed to each area. A jurisdiction is not necessarily 100% covered at this date.
Total Jurisdictions Deployed	The total number of counties, parishes, or independent cities to which IDENT/IAFIS Interoperability has been deployed by the date of the report. A jurisdiction does not need to be 100% covered to be included in this count.
AOR	Area of Responsibility covered by a specific field office.
